Summary

Software Engineer | React · Next.js · Flutter | 3+ years building production systems: 500K+ user mobile apps, B2B platforms serving 9,000+ businesses, and AI-integrated SaaS. Strong end-to-end ownership from architecture to deployment.

Experience

Product Engineer at Zero One Group

Sept 2022 - Present

- Architected and shipped a Flutter e-commerce app from ground up, scaling to 500K+ downloads on the Play Store.
- Built enterprise web platforms (Next.js, React) for telecommunications and retail clients, including an AI-integrated sales dashboard with real-time analytics.
- Engineered a secure desktop application (Tauri, Flutter) for a financial sector client, automating banking data extraction that previously required manual processing.
- Delivered an AI-driven SaaS platform (Next.js, AI SDK) for real estate professionals, integrating LLM-powered tooling for operational automation.
- Built an internal payment aggregator (React) handling multi-channel financial transactions across business units.

Software Engineer - Mobile (Intern) at Neurafarm

Jun 2021 - Sept 2021

- Developed "Sobat Tania", a cross-platform internal application using Flutter, deployed across Web, Android, and iOS
- Collaborated with Product Managers and UI/UX Designers to define scope and iterate on features based on user feedback

Education

Bachelor of Applied Science (BASc) - Informatics Engineering

2018 - 2022

- GPA 3.87

Politeknik Negeri Malang, Indonesia

Kampus Merdeka x Dicoding

Aug 2021 - Jan 2022

- Complete "Multiplatform" learning path at Dicoding

Dicoding, Indonesia

- Graduate with distinction as "Lulusan Terbaik" among 400 students

Bangkit Academy

Feb 2021 - Jul 2021

- Graduate with Distinction (Top 10% by performance among 3000 students)

Bangkit Academy, Indonesia

- Building an early detection of dementia with ML-integrated on Android

- Managed to achieve Google Associate Android Developer certification.

Skills

Programming Languages: TypeScript, Dart, Kotlin, Java

Frontend: Next.js, React, Tailwind CSS, TanStack Query, Framer Motion

Mobile: Flutter, Riverpod, GetX, BLoC, Android, Jetpack Compose

Backend & Infra: NestJS, Supabase, Firebase, Redis, Docker, Vercel, Stripe

Languages: English (Proficient), Indonesian (Native)

Awards and Honors

Associate Android Developer, Google

2021

Finalist, Kompetisi Mahasiswa Informatika dan Ilmu Komputer Perguruan Negeri

2019

Key Projects

P1 KickAvenue

Rebuilt Indonesia's leading authenticated sneaker marketplace from legacy codebase to Flutter as part of the mobile team (Flutter, Riverpod, Firebase)

P2 **Truequity**

Solo-built a full-stack wealth tracker consolidating crypto, US & IDX equities into one dashboard with real-time pricing, PnL calendar, benchmark comparisons, and AI-powered transaction entry via Claude Vision (Next.js, Supabase, TanStack Query, Recharts)

P3 **Sukanda Onelink**

Led frontend development of a B2B e-commerce platform for PT Diamond Food Indonesia, connecting 9,000+ F&B entrepreneurs across Indonesia (Next.js, TypeScript, PostgreSQL, TanStack Query)

P4 **AgentAI**

Built frontend and backend of an AI-powered marketing automation SaaS for real estate agents in a 2-person team (Next.js, NestJS, OpenAI, LangChain, Stripe, MongoDB)
